KENNETH CORBIN

Front-End Web Developer

301.704.3786
kennethcrb@gmail.com

PROFESSIONAL SUMMARY

As a Front End Developer, with eight years of agency experience, I have worked closely with various in-house and external teams. While focusing on user experience and reusability, I have developed and maintained feature-rich web applications for commercial brands, congressional campaigns, and issue advocacy organizations. My co-workers have recognized my work ethic, thorough consideration of project requirements, and ability to provide thoughtful information to non-technical personnel/clients. Recognizing that development is an ever-evolving process, quickly learning new skills has been an essential asset in my developer's toolbox.

EDUCATION

Howard University, Bachelors of Fine Arts (2005)
Montgomery College, Associates of Applied Sciences (2011)

DEVELOPMENT SKILLS

- HTML5, CSS3, LESS, Mobile Responsive Builds
- Vanilla JavaScript, JQuery, ReactJS Experience, AJAX, JSON
- PHP, MYSQL, WordPress (Theming and Plugins)
- Webpack Experience, Static Site Builders/Generators
- NPM (Node Package Manager), GitHub
- Interactive HTML Emails

DESIGN TOOLS

- Adobe Photoshop
- Adobe Illustrator
- Sketch

WORK HISTORY

Corbin Coding | Web Developer | 3/2010-Present
As a Freelance Web Developer, I design and develop user-friendly websites, focusing on building custom features to achieve client goals.

HZDG | Front-End Developer | 7/2013-12/2019
While utilizing various web technologies and frameworks, my responsibilities included building mobile responsive websites, micro-sites, and interactive HTML email templates from design comps (PSDs/Sketch). To ensure performance and cross-browser compatibility, I was responsible for testing, debugging, and site maintenance in preparation for client/vendor delivery.

CRAFT MEDIA DIGITAL | Front-End Developer | 8/2011-7/2013
As a team member of the "Digital Channel," I developed websites for high-profile political candidates, campaigns, and issue advocacy groups. Specifically, I was responsible for writing custom PHP applications, creating/editing graphics, theming WordPress sites and writing custom plugins/widgets. Other responsibilities included testing and maintaining digital assets, as well as collaborating with clients/vendors to define and implement new features.
